THE IDEAL WAY TO PREVENT HAIR REGROWTH

Output Voltage	12V
Output Current	2.5A
Rated Frequency	50Hz-60Hz
Net Weight	209g
Size	170*70*35mm

- ☐ WHITE
- ☒ PINK

For hair removal

With IPL technology, gentle pulses of light with wavelength between 500nm-1200nm are applied to the skin and absorbed by the hair root. The darker the hair, the better the pulses of light are absorbed.

The Lux+ high-intensity light pulses that cause hair follicles to shed naturally, leaving behind silky smooth skin.

For skin rejuvenation

With Lux+ intensity level 1-3, the device emits light on the targeted areas and helps to spur on the production of collagen, which will help to fill in lines and wrinkles or shallow scarring, while reducing redness, discoloration, and spots.
