More voluminous cheek, and chiseled jawline

4 Week

Lines and wrinkles become less visible

8 Week

Promote the growth of collagen, skin feel firmer

A COMBINATION OF MICRO-CURRENT AND HI-FREQUENCY SONIC TECHNOLOGY

The KAXA-LIFT is an ergonomically shaped sonic face massager that helps to refresh your face by targeting the most problematic areas, including your forehead, eye area, brows, liplines, cheeks and chin. All you need is 6 minutes a day to achieve a more radiant, younger looking appearance.

MICROCURRENT

The MARASIL KAXA-LIFT utilizes microcurrent technology for facial stimulation. The micro-current sends soft, gentle waves through the skin, tissues and down to the facial muscles. It stimulates ATP production which drives the creation of collagen, and give you an improved, lifted appearances.

HI-FREQUENCY SONIC

The Hi-Frequency Sonic pulsation helps to stimulate blood circulation, and boosts the absorption of your favorite daily anti aging skincare.

ERGONOMICALLY SHAPED TO TARGET THE MOST PROBLEMATIC AREAS

FOREHEAD

Reduce lines and wrinkles on your forehead.

EYE AREA

Help your eye radiate more energy, instantly.

CHEEKS

Give your more voluminous and lifted cheek.

CHIN

Curve out your jawline and redefine the look of your chin.

NECK

Tighten the loose skin around your neck.
